

WA STRATEGY AGAINST DRUG ABUSE

Statistical Bulletin Number 9, July 2000

DRUG OFFENCES IN WESTERN AUSTRALIA 1998 - 1999

Introduction

This bulletin contains a breakdown of the number of offences based on charges laid by the West Australian Police for the whole State for 1998 and 1999. The data is a count of the number of offences where a person has been processed and was extracted from the Offence Information System (OIS). Processed persons include arrests, summons, cautions or appearance before the Juvenile Justice Team.

This data has been provided to the WA Drug Abuse Strategy Office by the **Crime Information Unit** of the West Australian Police Service. This information reflects police activity and only deals with crime which has been detected and resulted in the apprehension of an offender. It is a count of the number of offences where a person has been processed.

Limitations

There are a number of limitations of this data as it:

- does not measure court outcomes;
- represents a count of multiple offences (as it does not count the number of distinct persons); and
- cannot readily identify the type of drug seized (as the seizure database is separate from the OIS and has unstructured data files and lacks uniform definitions).

As there may be multiple seizures of drugs for each offence report, duplicate seizures have been removed so that the count of seizures is based on the most serious offence. This is on a scale from (1) sell/supply (the most serious offence), (2) cultivation, (3) manufacture and (4) possession/use (the least serious offence).

Legislation

The data reported in this publication is concerned with offences contained in the **Misuse of Drugs Act 1981**, as follows:

- possession/use of prohibited drugs or prohibited plants;
- possession of smoking implements;
- sell/supply of prohibited drugs or prohibited plants;
- cultivation of prohibited plants;
- manufacture of prohibited drugs; and
- other drug offences.

This **Misuse of Drugs Act 1981** is applicable to offences involving a large number of scheduled prohibited substances or plants. There are also other offences that are dealt with under the **Poisons Act 1964**, primarily concerned with prescribed drugs, which are not included in the data used in this bulletin.

Summary

Over the two year period there were between about 3,000 and 3,500 drug offences per quarter, except for the June quarter 1998, when there was a total of 3,931 offences (Figure 1, page 3).

Type of offence

The most frequent charge involved possession and/or use of drugs, accounting for 54% of all drug offences in both years. There were between about 1,600 to 1,800 charges per quarter, except for the March quarters 1998 and 1999, when there was a total of 2,161 charges and 1,939 charges respectively (Table 1, page 3).

The second most frequent charge involved the possession of smoking implements, accounting for 31% and 32% of all drug charges in 1998 and 1999 respectively.

Age group

The most charges involved persons in the 15 to 34 year age range, with nearly 80% of all offences involving this age group (Table 2, page 3). The most frequent charges involved the 15 to 19 age group with 29% of all drug charges in both years. The second most frequent charges involved the 25 to 34 age group, accounting for 27% and 28% of all drug charges in 1998 and 1999 respectively.

Overall there were similar proportions of offences involving the seven age groups for both 1998 and 1999 as follows:

Published by the WA Drug Abuse Strategy Office

	1998	1999
<15	5.6%	5.1%
15-19	29.5%	28.9%
20-24	22.1%	21.6%
25-34	27.2%	28.3%
35-44	12.3%	12.1%
45-54	2.9%	9.4%
55+	0.4%	0.6%

Seizures

Over the two year period the total number of seizures increased by 41.2%, from 12,580 seizures in 1998 (Table 9, page 10) to 17,769 seizures in 1999 (Table 18, page 13).

From 1998 to 1999 there were increases in the number of seizures in relation to all drugs, except cocaine and LSD, as follows (Tables 10-17, pages 11-12; Tables 19-26, pages 14-15):

Amphetamines	+ 87.0%
Cannabis	+ 38.7%
Cocaine	- 53.8%
Dexamphetamines	+ 88.6%
Heroin	+ 26.8%
LSD	- 4.3%
Ecstasy	+ 67.7%
Methylamphetamine	+ 615%

1998 Overview

In 1998 there was a total of 13,322 drug offences (Table 5, page 6) of which 10,981 (82.4%) involved males (Table 3, page 4) and 2,341 (17.6%) involved females (Table 4, page 5).

For all age groups the greatest number of offences involved the possession and/or use of drugs. For those aged **less** than 45 years possession of smoking implements was the second most frequent offence. However, for those aged 45 years and older the second most frequent offence involved cultivation charges (Figure 4, page 6).

For both males (Figure 2, page 4) and females (Figure 3, page 5) with increasing age the proportion of offences involving less serious drug charges **decreased** (ie possession and/or use and possession of implements) compared to more serious offences (ie cultivation, sell/supply or manufacture).

There was an overall pattern of increasing seriousness of drug offending (ie cultivation, sell/supply or manufacture) with age (Table 5, page 6). This pattern is shown in the following breakdown where 4 out of 10 of all drug offences in the 55 years and older age group involved the most serious offences.

	Possession/use	Implements	Other
<15	58.9%	35.4%	5.6%
15-19	53.7%	38.3%	7.9%
20-24	54.9%	31.5%	13.6%
25-34	53.2%	28.7%	18.1%
35-44	49.8%	23.3%	26.9%
45-54	46.7%	16.4%	36.8%
55+	48.3%	12.1%	39.7%
All ages	53.4%	31.4%	15.1%

1999 Overview

In 1999 there was a total of 13,231 drug offences (Table 8, page 9) of which 10,808 (81.7%) involved males (Table 6, page 7) and 2,423 (18.3%) involved females (Table 7, page 8).

For all age groups the greatest number of offences involved the possession and/or use of drugs. For those aged **less** than 45 years possession of smoking implements was the second most frequent offence. However, for those aged 45 years and older the second most frequent offence involved cultivation charges (Figure 7, page 9).

For both males (Figure 5, page 7) and females (Figure 6, page 8) with increasing age the proportion of offences involving less serious drug charges **decreased** (ie possession and/or use and possession of implements) compared to more serious offences (ie cultivation, sell/supply or manufacture).

There was an overall pattern of increasing seriousness of drug offending (ie cultivation, sell/supply or manufacture) with age (Table 8, page 9). This pattern is shown in the following breakdown where 5 out of 10 of all drug offences in the 55 years and older age group involved the most serious offences.

	Possession/use	Implements	Other
<15	55.1%	38.1%	6.8%
15-19	55.3%	38.1%	6.6%
20-24	54.7%	32.3%	13.0%
25-34	53.6%	29.2%	17.3%
35-44	50.2%	24.9%	24.9%
45-54	43.7%	17.8%	38.5%
55+	36.9%	10.7%	52.4%
All ages	53.6%	31.9%	14.6%
